PROFESSIONAL SUMMARY

Backend-focused Software Engineer experienced in building scalable services with Go and modern architectures (Hexagonal / Ports & Adapters). Strong in API design, database modeling, and system design, with exposure to enterprise systems and cloud integrations.

Able to bridge business and technical perspectives, with a focus on delivering reliable, production-ready backend systems and continuously improving in cloud, authentication, and performance.

EDUCATION

- Rangsit University | 2021 - 2024**
- Bachelor of Science (B.S.), Computer Science
 - Graduated with First Class Honors | GPAX: 3.72
- Siam Business Administration Technological College | 2018 - 2021**
- Vocational Certificate, Business Computer
 - GPAX: 3.73

WORK EXPERIENCE

- Software Developer ERP - Teibto Co., Ltd. (2024 - 2025)**
- **Developed and customized** scripts and functions to meet specific project requirements within **Oracle NetSuite**, ensuring optimal system performance.
 - **Managed and enhanced** NetSuite solutions through SuiteScript development, workflow automation, and system **API integration**.
 - Successfully completed a 6-month Cooperative Education Program, gaining hands-on experience in ERP development.
- Teacher Assistant - Rangsit University (2022-2024)**
- Guided and mentored junior students in Java programming, focusing on coding exercises, debugging, and fostering a deep understanding of core programming concepts. understanding of fundamental programming concepts.
- Teacher Assistant - Siam Business Administration Technological College (2024)**
- Taught foundational web development, including HTML, CSS, JavaScript, and Bootstrap 5, to vocational students.

EXPERIENCE (PROJECT)

- AutoTrade Management System (Java + SQL)**
- Developed a used car trading system covering comprehensive functionalities: purchasing, sales, payment processing, customer history tracking, and automated reporting.
- Smart Car Model (IoT, Arduino, C++)**
- Designed a mobile-controlled 4WD smart car model utilizing sensor-based collision prevention to detect and avoid obstacles.
- Workspace Booking System (ReactJS, Tailwind CSS, NodeJS, SQL)**
- Created a platform for booking/canceling desks and meeting rooms, featuring real-time availability checks and automated email confirmations.
- Flappy Bird Game Blockchain (Solidity, HTML, CSS, JavaScript, ReactJS)**
- Developed a blockchain-based Flappy Bird game allowing players to earn tokens to purchase NFTs/in-game skins, powered by Solidity smart contracts for secure transactions.
- Office Equipment Tracking System (ReactJS, Tailwind CSS, NodeJS, SQL)**
- Developed a web-based system with key features: equipment record management, advanced search filters, and user authentication with role-based access control.

SKILLS

- Programming Languages & Tools**

 - **Backend** : Java, Python, Node.js, C++
 - **Frontend** : JavaScript, React.js, HTML, CSS, Figma (UI/UX)
 - **Database/ERP** : SQL, Oracle - NetSuite ERP
 - **Other (Blockchain/Mobile)** : Solidity, Dart (Flutter)
- Languages**

 - Thai | Native
 - English | Intermediate
